Front upright protection for Drive-In Rack
Protect-a-RACK

A close-up photograph of a heavy-duty orange metal upright post. The post is part of a larger structure, likely a storage rack, with several horizontal bars extending from it. Some of these bars have red safety caps or end stops. The background shows a grid-like structure, possibly a floor or a wall, made of dark material with a pattern of small holes or indentations.

A 3D perspective rendering of a yellow, U-shaped protective channel. The channel is long and narrow, with a flat bottom and raised sides. It features several internal structural details, including a central longitudinal rib and several cross-ribs. The front end of the channel is reinforced with a complex, multi-faceted structure. The channel is shown against a white background, with a dark gray horizontal band across the middle containing text.
